PRO:CENTRIC DIRECT

Pro:Centric Direct (PCD) is a content management system based on HTML with a built-in TV UI design/editor that runs over an IP or an RF network. This feature also allows for administrative remote management of all compatible TVs on the property.

When a patient turns on the TV, they are immediately welcomed with a hospital branded user interface and an interactive program guide that allows them to watch TV view current weather conditions, or navigate pages of customized content (script, images or video).

PRO:IDIOM

Pro:Idiom unlocks access to premium content to help ensure rapid and broad deployment of HDTV and other digital content. Pro:Idiom has been designed specifically for users of premium HDTV content from cable, satellite, or video on demand (VOD) services, and help reduce costs and reduce maintenance. This leading DRM system is embraced for its security solutions, which helps prevent illegal downloading of copyrighted content.
