

Hospital TV 75UR762M

UL-Listed Hospital TV with NanoCell Technology

NanoCell TECHNOLOGY

* Conventional refers to LG's UHD TVs without NanoCell technology.

Real 4K Made by Pure Colors

This hospital TV delivers a broad spectrum of color with advanced NanoCell technology.

Nano Bezel Adds Sophisticated Ambiance

The sleek, minimal bezel surround is designed to reduce distractions and blend elegantly into existing interiors for a more immersive.

HOSPITAL-FOCUSED FUNCTIONS

Pillow Speaker Ready

The hospital TV is equipped with a compatible pillow speaker* interface, giving patients the ability to control the TV sound and video from their bed.

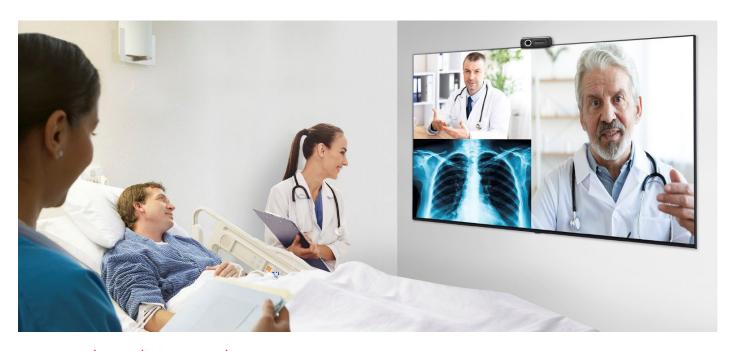

* Pillow speaker is not provided by LG. (sold separately)

Nurse Call System Ready

Through nurse call system provided by a pillow speaker* connected to LG hospital TV, staff can be called immediately for emergency.

UL Hospital Grade Listed

The UR762M hospital TV is designed for the healthcare and hospital environment, meeting safety standards by UL.

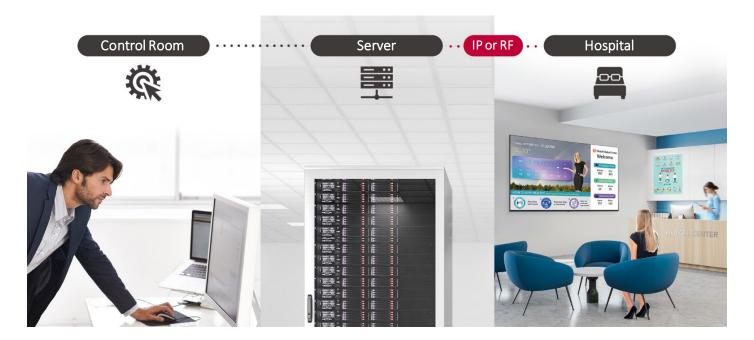

Group Telemedicine Ready

The UR772M series NanoCell Hospital TV is ready for web-based telemedicine. System Integrators can develop and deploy their web applications without additional video conferencing equipment for 1:1 or 2:1 remote meetings. Camera angle and zoom control during a session are also possible.*

^{*} The feature above requires a separate web application. Supporting camera: Logitech C310, MS lifecam HD-3000

SMART MANAGEMENT

Pro:Centric Hospital Management Solution

LG's Pro:Centric Direct is a robust hospital content management solution that offers simple editing tools and provides IP network-based remote management and service capabilities*. Pro:Centric Direct enables users to edit their interface easily by providing a customized interface and efficient management of all TVs in the hospital.

st The actual screen may be slightly different. Some features may not be supported based on PCD versions.

Slim Depth for a Sleek Look

With Nanocell offering a slimmer* design, the 75UR762M integrates smoothly into hospital interiors.

* Compared to LG's previous hospital TV UT672M series

Pro:Idiom

The 75UR762M provides embedded Pro:Idiom decryption, unlocking access to high-value digital content with Pro:Idiom DRM (Digital Right Management) which prevents illegal copying of the content.

USER CONVENIENCE

SoftAP

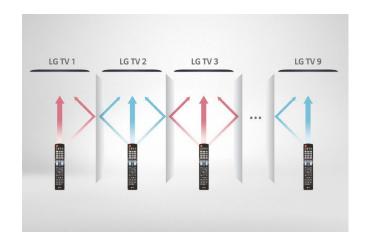

Software-enabled Access Point (SoftAP) is a "virtual" Wi-Fi feature that enables patients to connect their own devices to the SoftAP by using the TV as a wireless hotspot.*

* SoftAP should be set in the installation menu after the TV is turned on. Screen Share may not be operated at the same time.

USB Cloning

USB data cloning makes managing multiple displays easy. Instead of setting up each display one by one, data can be copied to a USB* for one display, and be sent to the other displays through a USB plug-in.

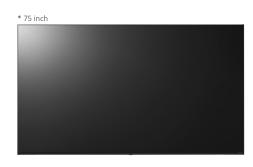

Multi-code IR

Multi-code IR* function eliminates any remote-control signal interaction between multiple TVs in one place. LG hospital TV supports this when used with the Multi-code IR remote control, so users can freely control their own TVs without disturbing the others.

^{*} USB is not provided by LG. (sold separately)

^{*} Multi-code IR remote control is not provided by LG. (sold separately)
